

Fund Objective

Long-term growth of capital with the objective of outperforming Russell 2000® Growth and Russell 2500™ Growth by investing in small/mid-cap US companies, in accordance with Radiant's Bright Future Smaller Companies strategy.

Investment Philosophy

Radiant's investment philosophy is based on the premise that there is investment opportunity to be found at the intersection of fundamentals and environmental, social, and governance (ESG) criteria. The investment team believes that companies that are attractive along both dimensions will have a distinct advantage over their peers and will meet with outsized investment returns. The team's evaluation of company fundamentals anchors on a proprietary assessment of Quality and Sentiment, using Valuation as an important price discipline. A core foundational principle is that ESG information is economic and provides a holistic view of the threats and opportunities faced by companies. Radiant believes that the coming years will usher in profound changes with respect to investor assessment of company risk and upside opportunity and that ESG and concepts of 'impact' will be central to this evolutionary thinking.

Investment Approach

Radiant's investment process begins with an assessment of the fundamental and ESG characteristics of all stocks in the universe. As a first step, companies which the team believes exhibit extreme tail risk are eliminated as they represent sources of uncompensated risk. Stock selection targets companies exhibiting both attractive fundamentals and attractive ESG attributes, which is subject to a qualitative review of resulting portfolio candidates to ensure they represent the team's best ideas. Portfolio construction seeks to maximize risk-adjusted returns with the objective of delivering sustainable long-term outcomes. The final portfolio therefore contains Radiant's best quantitative and qualitative insights, and eliminates exposure to severe controversy companies and lines of business.

Returns presented are based on the Radiant Bright Future Small Cap Growth Composite ("Composite"). The Composite benchmarks are Russell 2000® Growth Index and Russell 2500™ Growth Index. This composite inception on January 1, 2022. Returns for periods less than one year are not annualized. Composite and benchmark returns are presented gross of withholding taxes. Composite gross-of-fees returns include reinvestment of dividend and income and are presented before investment management fees and benchmark returns are presented gross of all trading expenses. Net-of-fees returns are net of model management fees and are derived by deducting a model management fee of 0.0583%, 1/12th of the highest tier management fee of 0.70%, from the gross returns each month. The actual returns for each client will be reduced by such fees and expenses as described in its individual contract, or fund prospectus, if applicable, which may vary depending on, among other things, portfolio size, client domicile, etc. Therefore, actual net of fee performance of all portfolios in the composite may be different but is no less than the model net of fee performance. Past performance does not guarantee and is not a reliable indicator of future results. Investment returns and principal values will fluctuate so that an investor's investment, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown.

ESG Key Performance Indicators

Top section: Lower is better. Bottom section: Higher is better.

Index and GICS Information

The Russell 2000® Growth Index referenced herein has been included merely to show the general trends in certain segments of the US stock markets in the periods indicated and is not intended to imply that the investment returns of any Radiant-managed investment product will be comparable to such indices either in composition or element of risk. Significant differences between such investment products and the indices may exist including, but not limited to, risk profile, liquidity, volatility, and asset composition. Radiant Global Investors LLC follows standards established by the Global Industry Classification Standard (GICS). GICS was developed by MSCI in collaboration with S&P Dow Jones Indices designed to respond to the global financial community's need for a global, accurate, complete and widely accepted approach to defining industries and classifying securities by industry. Its universal approach to industry classification aims to improve transparency and efficiency in the investment process.
