

Fund Objective

Long-term growth of capital with the objective of outperforming the Russell 2000™ Index by investing in small US companies, in accordance with Radiant's Bright Future Smaller Companies strategy.

Investment Philosophy

Radiant's investment philosophy is based on the premise that there is investment opportunity to be found at the intersection of fundamentals and environmental, social, and governance (ESG) criteria. The investment team believes that companies that are attractive along both dimensions will have a distinct advantage over their peers and will meet with outsized investment returns. The team's evaluation of company fundamentals anchors on a proprietary assessment of Quality and Sentiment, using Valuation as an important price discipline. A core foundational principle is that ESG information is economic and provides a holistic view of the threats and opportunities faced by companies. Radiant believes that the coming years will usher in profound changes with respect to investor assessment of company risk and upside opportunity and that ESG and concepts of 'impact' will be central to this evolutionary thinking.

Investment Approach

Radiant's investment process begins with an assessment of the fundamental and ESG characteristics of all stocks in the universe. As a first step, companies which the team believes exhibit extreme tail risk are eliminated as they represent sources of uncompensated risk. Stock selection targets companies exhibiting both attractive fundamentals and attractive ESG attributes, which is subject to a qualitative review of resulting portfolio candidates to ensure they represent the team's best ideas. Portfolio construction seeks to maximize risk-adjusted returns with the objective of delivering sustainable long-term outcomes. The final portfolio therefore contains what we believe to be Radiant's best quantitative and qualitative insights, and eliminates exposure to severe controversy companies and lines of business.

Returns presented are based on the Radiant Bright Future Small Cap Core Composite. This composite inceptioned on October 1, 2022. Returns for periods less than one year are not annualized. Composite and benchmark returns are presented gross of withholding taxes. Composite gross-of-fees returns include reinvestment of dividend and income and are presented before investment management fees and custodial fees but after all trading expenses. Net-of-fees returns are net of model management fees and are derived by deducting a model management fee of 0.0583%, 1/12th of the highest tier management fee of 0.70%, from the gross returns each month. The actual returns for each client will be reduced by such fees and expenses as described in its individual contract, or fund prospectus, if applicable, which may vary depending on, among other things, portfolio size, client domicile, etc. Therefore, actual net-of-fee performance of all portfolios in the composite may be different but is no less than the model net-of-fee performance.

Past performance does not guarantee and is not a reliable indicator of future results. Investment returns and principal values will fluctuate so that an investor's investment, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown.

ESG Key Performance Indicators

Top section: Lower is better. Bottom section: Higher is better.

See Page 2 for ESG KPI definitions.

Any such offer or solicitation for an interest in any product may only be made by means of delivery of an approved offering memorandum or prospectus ("Offering Document"). The information in this presentation is qualified in its entirety, and subject to, the information contained in the relevant Offering Document.

The information herein does not take into account the particular investment objectives, restrictions, or financial, legal or tax situation of any particular investor. Before making an investment in a product managed by Radiant, prospective investors are advised to thoroughly and carefully review the Offering Document or client agreement, as applicable, with their financial, legal and tax advisors to determine whether such an investment is suitable for them.

The information contained in this presentation is designed to highlight market and investment strategy information. While Radiant believes all the information set forth is from reliable sources, no representation or warranty can be made with respect to its accuracy or completeness. Any projections, market outlooks or estimates in this presentation are forward-looking statements and are based upon internal analysis and certain assumptions, which reflect the views of Radiant and should not be construed to be indicative of actual events which will occur. As such, the information may change in the future should any of the economic or market conditions Radiant used to base its assumptions change.

Index and GICS Information

The Russell 2000™ Index referenced herein has been included merely to show the general trends in certain segments of the US stock markets in the periods indicated and is not intended to imply that the investment returns of any Radiant-managed investment product will be comparable to such indices either in composition or element of risk. Significant differences between such investment products and the indices may exist including, but not limited to, risk profile, liquidity, volatility, and asset composition.

Radiant Global Investors LLC follows standards established by the Global Industry Classification Standard (GICS). GICS was developed by MSCI in collaboration with S&P Dow Jones Indices designed to respond to the global financial community's need for a global, accurate, complete and widely accepted approach to defining industries and classifying securities by industry. Its universal approach to industry classification aims to improve transparency and efficiency in the investment process.
